

October 17, 2017

Coral Sands Resort has been working hard to improve the resort for our valued owners and guests. We are excited to share the projects we have completed in 2017 and let you know about the projects we have planned for 2018.

In our 2017 season, we have retiled units 1, 5, 8, 10 and 11. We constructed a cabana on the beach for guests to use and relax in. We also built another diving rack to allow for a drying area for guest's diving and snorkeling gear.

The projects that we have planned to begin include the remodeling of units 6 and 7, which consist of retiling and the removal of the tub in the master bath. We will also be cleaning and retiling the upstairs deck due to water into the office when it rains.

There will be brand new appliances purchased and installed in all units, and new mattresses, beach towels and couches will be purchased for units 5, 8 and 9.

We believe these improvements will make Coral Sands Resort even more enjoyable for our guests!
